| Grade | 4SC Slicer Log |

Specifications

| | |
|-------------------------|------------|
| Minimum Diameter | 35 cm |
| Minimum Length | 2.5 meters |

Grade Detail

This is a straight log with straight grain. It has centered heart. It will consist of a first cut. Logs are sourced from the Northern Region of the Eastern United States. Long winters and short summers produce very slow growth, tight texture, and light color. If you are truly demanding a high quality red oak supply, this would be an excellent choice.

Log is suitable for higher end panel production.

Northern Red Oak is available in 3SC Veneer as well.
